### Blackberry (Navaho)

Fruit are medium in size, excellent flavor, and an average sugar content of 11-12%. Fruit ripen mid season over a five to six week period with good yields. Fruit are also very firm making storage and handling potential exceptional. (2 year plant, bareroot)

**Price: \$8.00 each**

### Raspberries (Dorman Red)

Fruit are medium to large in size, firm, juicy, excellent flavor, and ripen mid to late summer. Plant growth is very vigorous and plants are very prolific. Dorman Red is the best raspberry for the south; it is heat, drought, and disease resistant. Berries are not fully ripe when they first turn red. The fruit is ripe when they are a dark red. Climate Zones 7-9. (2 year plants, bareroot)

**Price: \$8.00 each**

### Blueberry (Premier)

Ripen early to mid season but usually earlier than other mid season varieties. Fruit are larger in size with excellent color, great flavor and a dry stem scar. Plant growth habit is upright and vigorous. Recommended for all applications but is especially recommended for hand picking. (2 year plant, bareroot)

**Price: \$8.00 each**

### Blueberry (TifBlue)

Ripen mid to late season. Fruit are medium size with good flavor and an average stem scar. Plants have a good upright growth habit. Tifblue is one of the oldest cultivars that is still being planted, released in 1955 by the University of Georgia. Tribblue is recommended for home use. (2 year plant, bareroot)

**Price: \$8.00 each**

### Blueberry (Climax)

Early fruiting variety that matures normally in the middle of June. Plants have upright growth habits with more of an open spreading crown than other varieties. Climax has been used for years in commercial, pick your own, and home settings. Berries are firm with excellent flavor, good color, and a very small stem scar. (2 year bareroot)

**Price: \$8.00 each**

### Fig (Celeste)

Fruit are small to medium in size, light brown to violet-brown skin, whitish pink color flesh, a closed eye, and very few seed. Plants produce in early summer, cold hardy through climate zone 6, and are self-pollinating. Recommended for fresh eating, preserves, drying, and canning. (2 year bareroot)

**Price: \$8.00 each**

### Fig (LSU Purple)

Fruit are medium in size, purple skin color, reddish pulp, and a good flavor. Plants are very vigorous and prolific bearing twice in most years. Plants are also very hardy and adaptive in the South. Recommended for fresh eating, canning, and preserves. (2 year bareroot)
